

SEALED STERILIZATION CASES & BASKETS

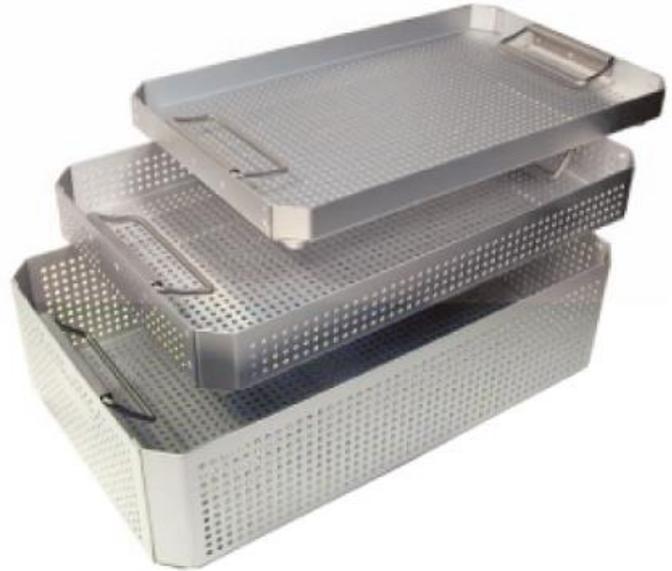

MediTray® Instrument Baskets

- Modular system of inserts and case trays
- Numerous customizable options
- Protects surgical devices
- Facilitates the instrument count process
- Validated wrapped and containerized

MediTray baskets are designed to stack one on top of the other within the SteriTite container.

They are highly perforated and manufactured from the highest quality materials. As with all

MediTray and SteriTite products, aluminum components are anodized and stainless steel parts are passivated for corrosion resistance.

The top level of the MediTray endo system can be ordered with an optional support bar to secure Kerrison Ronguers for Laminectomy sets. The top level and a second level, if required, are designed as bridges with parallel BackBone brackets to secure handheld instruments such as graspers and forceps. Most units come with an accessory tray designed to secure trocars or cannulas. The base tray is ideal for placement of scopes, camera, light cord and other instrumentation.

Utilize the four tier ENDOF1 or three tier ENDOF1T456 tray systems in a full size SteriTite container for Lap Chole when numerous instruments are required for a procedure. Use our 3/4 size ENDOQ1 for an Arthroscopy set.
